

CES-Guest WIFI Instructions - Windows PC

Cooperative Extension Service guests can connect to the CES-GUEST Wifi access points without having an Extension AD account. These instructions cover the process of connecting and agreeing to the Terms of Use Policy.

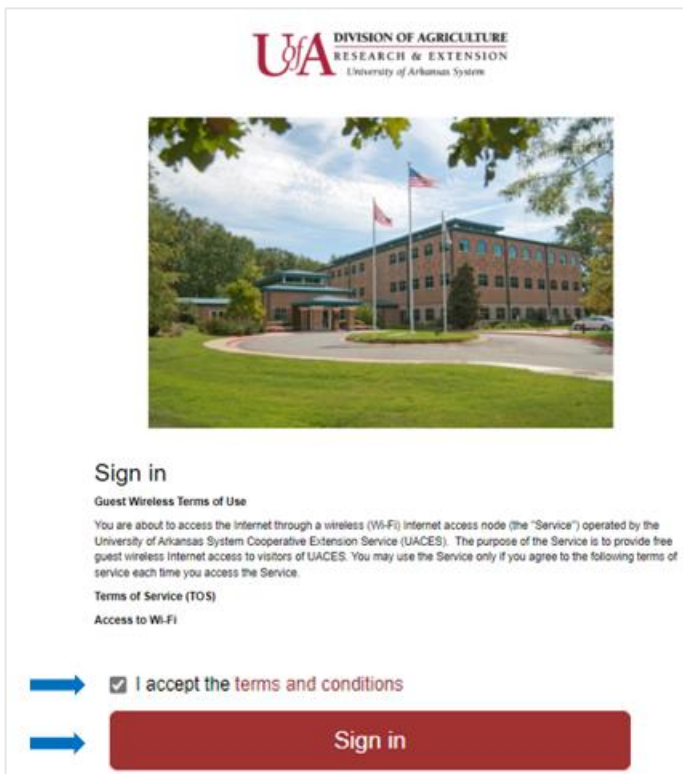

Connecting with a Windows PC

Select the Windows network connection icon from the system tray (bottom right) to expand the available connections menu.

Click on "CES-GUEST" from the list.

Do not check the **Connect Automatically** box if this is just a temporary connection.

Click on **Connect**.

Your default browser will automatically open and navigate to the "*Guest Wireless Terms of Use*" webpage.

Read the policy and check the box next to **I accept the terms and conditions**. Then click on **Sign In**.

You are now connected and can use the CES-Guest WIFI network while on campus.
